

NEW TECHNOLOGY

...FOR YOUR COMFORT AND HEALTH

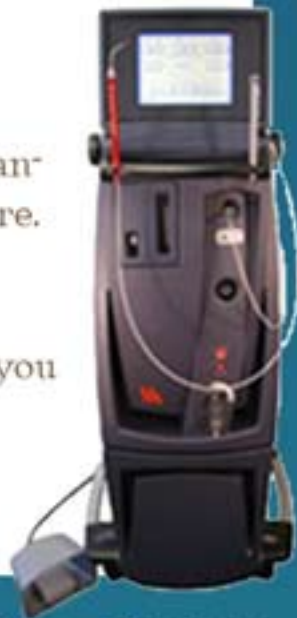

GROVE DENTAL ASSOCIATES

We are excited to offer you the latest innovations in dental technology. The PerioLase Dental Laser will help us create an exceptional dental experience for you. It allows us to perform many gum tissue procedures without causing the trauma associated with traditional gum surgery. PerioLase's precision laser beam effectively removes bacteria, damaged gum tissue, overgrown gum tissue, and can even perform soft tissue biopsies and cold sore treatment.

- There's no cutting and no suturing.
- There's much less discomfort with LASER PERIODONTAL THERAPY[®] than with standard surgery - during and after the procedure.
- It takes less time than traditional surgery.
- LPT gives better, longer lasting results.
- There's less than 24 hour recovery period, so you won't lose time from work.
